Company Profile

Date of Incorporation: 1986/10/24

IPO: 1999/6/3

Stock code: 2465

Capital: 839 million NTD

Chairman: K.S. Lu

President: Jerry Liang

Headquarters: Taipei, Taiwan

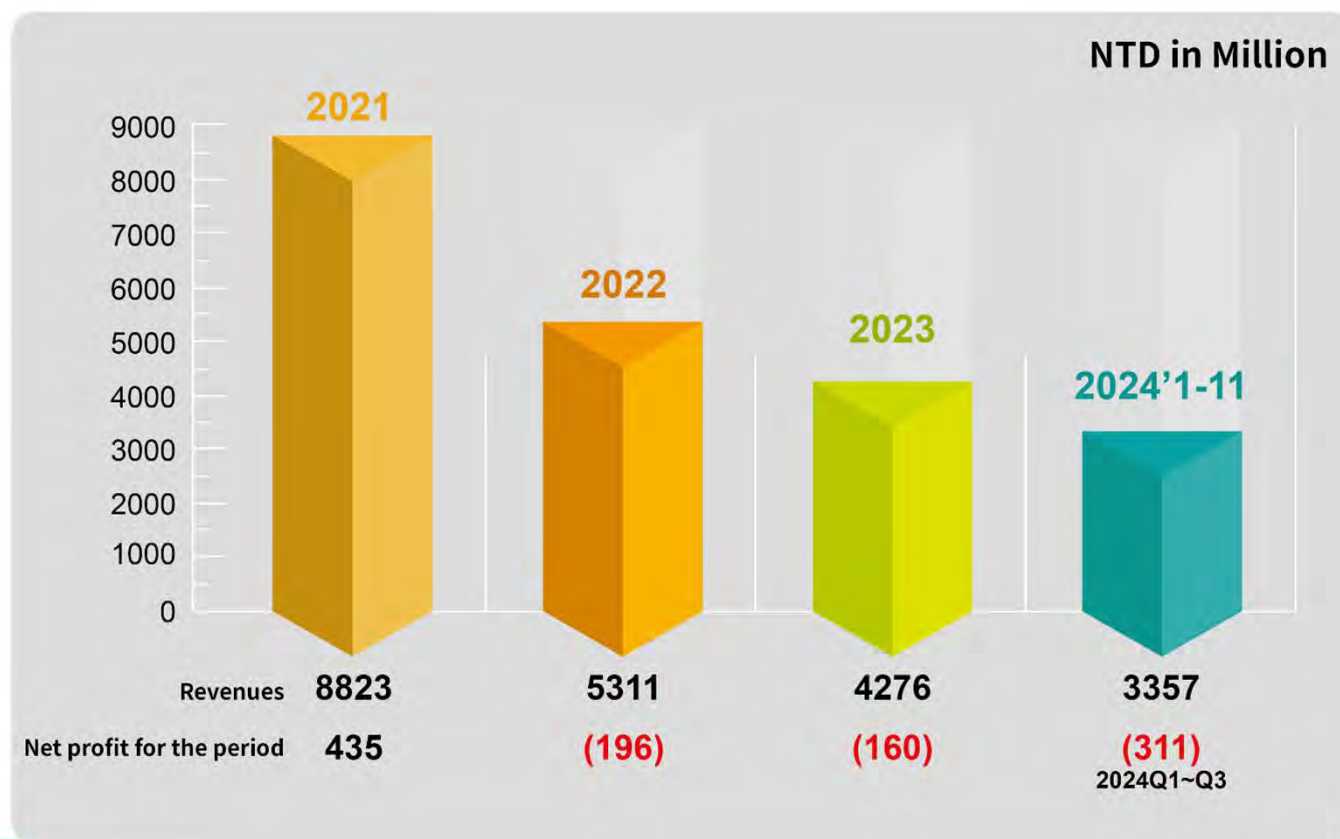

Subsidiaries: China and Japan

Number of employees: 340

A Leading Brand of Graphics Cards for 38 Years

A full range of consumer/workstation graphics cards, powered by NVIDIA Ada Lovelace architecture, combining the third-generation RT core and the fourth-generation Tensor core, provide high-quality and diverse products to fully meet the needs of the market.

Comprehensive AI Cloud Computing Solutions

- Enterprise-grade NVIDIA-Certified systems.
- Software integration, system planning, and maintenance services.

NVIDIA
Certified

WS750
1 CPU, 1 GPU

WS850
1 CPU, 2 GPU

WS950

PCIe 5.0

AI Management Software. The AIDMS management process uses a no-code approach, enabling rapid AI deep learning and model training with a single click, helping to quickly realize AI digital transformation with Leadtek's support.

Leadtek Zero Client & Thin Client

Simplified IT management and ultra-high display performance

Leadtek provides truly stunning image display, fast and responsive user experience, excellent power efficiency, and the most reliable and durable terminal solutions for enterprises and organizations that value data security and professional performance, delivering optimal performance for their on-premises data center or public cloud high-performance workstations or virtual machines, even under the most challenging network connection conditions.

- **Trusted Zero Client** — Optimal remote connection security and PCoIP Ultra performance, managed via DMS device management software integrated with Anyware Trust Center, enabling zero trust architecture in the digital workspace.
- **Zero Client** — with no local storage and operating system.
- **Thin Client** — Optional smart card reader authentication, effectively enhancing information security protection.
- **Ultra-Thin Client** — using non-removable embedded Multimedia Card (eMMC) to secure business-sensitive data.

NVIDIA DLI Course

Leadtek is an NVIDIA Deep Learning Institute (DLI) authorized training partner, with courses taught by Leadtek instructors who have obtained NVIDIA DLI instructor certification. New popular courses on Generative AI and Large Language Models (LLM) will be added in 2025.

Building RAG Agents with LLMs

with Large Language Models (LLMs)

NVIDIA Omniverse Enterprise

Leadtek is the Asia-Pacific distributor of the NVIDIA Omniverse Enterprise platform.

NVIDIA vGPU Solution

In a virtualized environment that's powered by NVIDIA virtual GPUs, the NVIDIA virtual GPU (vGPU) software is installed at the virtualization layer along with the hypervisor. This software creates virtual GPUs that let every virtual machine share the physical GPU installed on the server. Demanding engineering and creative applications, as well as compute-intensive workloads like AI and data science, can be supported in a virtualized and cloud environment.

NVIDIA Virtual Compute Server(vCS)

Power the most compute-intensive workloads with virtual GPUs

NVIDIA RTX Virtual Workstation (vWS)

Virtual Workstations for creative and technical professionals using graphics applications.

NVIDIA Virtual PC (vPC)

Virtual desktop infrastructure for knowledge workers who use office productivity applications and multimedia.

NVIDIA Virtual Applications (vApps)

Application streaming with Remote Desktop Session Host solutions.

Leadtek Big Data Solution

Provide information products and services for efficiency optimization and decision-making assistance

Leadtek Big Data serves five major industries. Through a big data platform, it transforms massive amounts of data in databases into useful information, leveraging data advantages. We assist in building data collection, modeling and data cleansing, data storage, data mining, data analysis, decision models, and an intelligent visualization platform to help users manage efficiently, precisely focus on development strategies, and create value.

Fields of application

Leadtek Big Data Receives Four Major SGS Information Security Certifications

Leadtek has received
4 international information security
management certifications from SGS

Information Security
ISO 27001

Cloud Service Information Security
ISO 27017

Privacy Information
ISO 27701

Cloud Service Personal Data Protection
ISO 27018

Leadtek's big data services have received SGS ISO international management system certifications, providing customers with 360-degree comprehensive international high-standard security management services encompassing system information security, cloud security, and personal data security.

AI Cloud Health Management and Healthcare Solution

MIT, R&D and Manufactured in Taiwan

Republic of China Patent Certificate No. D223907

- 1 amor SwingRing provides the user with records of their daily practice parameters and their effects on the body.
 - 2 The user's swing parameters can be detected by using a three-dimensional accelerometer, so as to improve the efficiency and accuracy of exercise.
 - 3 amor SwingRing can detect the user's HRV and biological age by a photoplethysmogram (PPG) sensor.
 - 4 APP of amor SwingRing provides the record of 100-day routine, and the user can experience the effective power of it.
 - 5 amor SwingRing is lightweight and waterproof, making it convenient to wear and use every day.

BtNPN Nanometer Penetration Technology X High Curcumin Content

US FDA Registration (Listing No.: D524888)

Empathy Infused with Ginger Patch Healthcare

Recommended by Orthopedic Authority
Superintendent Dai Nianguo

BtNPN Plant Nano Patch

Penetration Technology

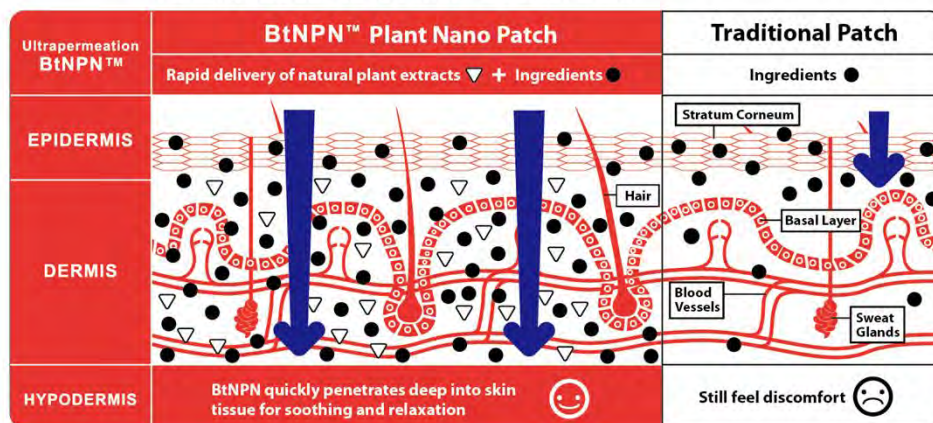

BtNPN has obtained invention patents in Taiwan and mainland China, and is a new type of skin penetration technology. It uses natural plant extracts to activate the skin, creating new channels in the skin tissue and increasing skin permeability. It encapsulates active ingredients for rapid passage, quickly penetrating deep into the lower layers of the skin, resulting in good absorption and excellent results."

Truly Effective

BtNPN Nanometer Penetration Technology & High Curcumin Content

Transdermal Absorption Achieves over **85%** Effectiveness Compared to Injections

Citation is based on the results of the animal smearing experiment with transdermal coating, and the effect of the product may vary depending on the user.
(Fuh, Y. M.; Pham, D. C.; Weng, C. F. Effects of sting plant extracts as penetration enhancers on transdermal delivery of hypoglycemic compounds. Medicina 2019, 55, 121-133.)

Regain Vitality! 👍

Only 7 days physical and mental health UP

Just stick it,
One tip to increase vitality and enhance immunity

Experimentally confirmed: effectively improve SDNN

Improve 31%!

SDNN

Before After

SDNN, Standard Deviation of NN intervals, is an indicator of overall heart rate variability and is the most representative parameter of HRV. Within the normal range, SDNN is also a good prognostic indicator, that is, a larger SDNN indicates stronger vitality.

Low SDNN indicates poor physical and mental health, high risk of inflammation, aging, and relatively poor immunity.

Taiwan Healthcare/Medical/Biotech Distribution Channels

BtNPN Plant Nano Patch

Medfirst Healthcare Services (320 stores)

Wellcare Medical Supplies (210 stores)

Yourchance Pharmacy (160 stores)

E-life Mall (316 stores)

- Medium-sized chains: Approximately **130** medium-sized pharmacy chains and independent pharmacies
- More than **1000** physical retail locations throughout Taiwan
