
*** Operator Instruction for `nvidia-bug-report` ***

How to run `nvidia-bug-report` on Linux systems

1) Log in to “root”

a. At command line # Type **`nvidia-bug-report.sh`**

b. **`nvidia-bug-report.sh`** will now collect information about your system and create the file "**`nvidia-bug-report.log.gz`**" in the current directory

2) Attach resulting “**`nvidia-bug-report.log.gz`**” file to NVIDIA RMA form.

a. Also attach Application failure data when available.
