Leadtek Big Data Solution

Provide efficiency-optimized information products and services that help decision making

We assist in the construction of data collection, modeling and cleaning, data storage, data acquisition, data analysis, decision-making models, and intelligent imaging platforms to help users in efficient management, precise focus on development strategies, and create value.

Fields of application

- Educational Unit
- Financial System
- Medical Institution
- Private Enterprise
- Public Agency
Facilitate the optimization of the reporting operations of medical institutions, and reduce the burden of tedious and repetitive tasks for users. Through the verification mechanism, reduce the risk of being deleted and indirectly increase the number of declared benefit points. Get instant and highly reliable data analysis results quickly and immediately. Remind the declaration optimization/doubtful items to reduce the omission of manual inspection. Real-time presentation of data analysis charts related to declarations. Assist the hospital to grasp key information about medical decision-making in advance.
NVIDIA DRIVE
Self-driving Car Development Kit

NVIDIA DRIVE® embedded supercomputing platforms process data from camera, radar, and lidar sensors to perceive the surrounding environment, localize the car to a map, and plan and execute a safe path forward.
AI Noise Cancelling TWS Earbuds

Using system-in-package (SiP) chips and Leadtek independently developed AI Based oc_NS call noise reduction technology.
