AI Management Software

The AIDMS management process uses a graphical interface. Users do not need to write programs (No-Code). Start AI deep learning and model training with one click, complete training and verification in three days, and quickly implement application in seven days. Even users who don't understand AI and codes can quickly realize AI digital transformation with Leadtek's assistance.

Industry application fields:
- Defect detection
- Machine vision
- Smart monitoring

Full visual operation AI process management platform:
- Image dataset management
- Model training and verification
- Model deployment
- AI reporting system

No-Code AI process management platform

Leadtek is the Asia-Pacific distributor of the NVIDIA Omniverse Enterprise platform. Creators, designers, and engineers can integrate users and top professional 3D design tools on the Omniverse platform. As updates, iterations and changes do not require data preparation, they are instantly reflected to simplify the work process.
Leadtek Big Data Solution

Provide efficiency-optimized information products and services that help decision making

We assist in the construction of data collection, modeling and cleaning, data storage, data acquisition, data analysis, decision-making models, and intelligent imaging platforms to help users in efficient management, precise focus on development strategies, and create value.

Fields of application

- Educational Unit
- Financial System
- Medical Institution
- Private Enterprise
- Public Agency
ProfitPoint
Intelligent assistant system for national health insurance declaration

- Facilitate the optimization of the reporting operations of medical institutions, and reduce the burden of tedious and repetitive tasks for users
- Through the verification mechanism, reduce the risk of being deleted and indirectly increase the number of declared benefit points
- Get instant and highly reliable data analysis results quickly and immediately

- Remind the declaration optimization/doubtful items to reduce the omission of manual inspection
- Real-time presentation of data analysis charts related to declarations
- Assist the hospital to grasp key information about medical decision-making in advance
NVIDIA DRIVE® embedded supercomputing platforms process data from camera, radar, and lidar sensors to perceive the surrounding environment, localize the car to a map, and plan and execute a safe path forward.
AI Noise Cancelling TWS Earbuds

Using system-in-package (SiP) chips and Leadtek independently developed AI Based oc_NS call noise reduction technology.
